

Spray System for removable rubber coating

Product features

- // Spraying system designed for applying rubber coating onto vehicles
- // Complete creative flexibility; apply graphics, modify wheels and spoilers or do a total re-spray
- // High-performance turbine for a perfect professional finish
- // Precision application for detailed work and hard to reach areas such as wheels and radiator grills
- // If you get tired of the old colour simply peel off the rubber coating and spray on a brand new colour
- // Rubber coatings protect the vehicle from stone chippings, scratches and colour fading

Optimal safety

no electrostatic charge from the spray gun or air hose

Effortless application

compact & lightweight gun with separate turbine for ease of movement

Large working radius

12 mtr hose to allow easy manoeuvrability around the vehicle

High quality results

adjustable spray nozzle with 3 settings for a perfect coverage

Large coverage

with an 800 ml tank

Fine atomisation

powerful X-Boost turbine for optimal spraying performance and professional finish

Technical data

Paint volume 200 ml/min

Atomisation power 200 W

Max. viscosity 170 DIN/sec

Power consumption 630 W

Part number 235 7113

**SPRAY
& PEEL**

Spray System for removable rubber coating

In 3 easy steps

Step 1 Clean the car thoroughly, mask and degrease

Step 2 Apply thin layers (see rubber coating manufacturer instructions)

Step 3 Remove masking and excess rubber coating

Motor Spray with Earlex

Confidence for both first time users and experts

World leading manufacturers of spray systems, the MotorSpray 3000 has been designed so it is simple to use and provides professional results every time whether you are a first time user or a professional.

Suitable for all rubber coating materials

Designed to spray all types of rubber coating material as well as solvent and water based enamels, primers and lacquers. Ongoing testing ensures that it works with all manufacturers of rubber coatings.

Safety with world leading turbine technology

This product has been specially developed with rigorous safety measures for all removable rubber spray materials. The MotorSpray 3000 meets with all legal requirements and has been subjected to extensive testing to ensure complete customer safety.
